Abstract

Natural or synthetic, purified polypeptide (I), designate corneodesmosin, having 529 amino acids, reproduced, and its fragments are new. Also claimed are: (i) mixture of polypeptides (Ia) produced by proteolysis of (I) or its fragments; (ii) nucleic acid (II) encoding (I), specifically a 1590 bp sequence reproduced; and (iii) cosmetic or pharmaceutical composition containing a protease able to breakdown (I).
